Section 2I. Required consultation or coordination between the lead agency and/or the RFO and another governmental unit including tribes:

Easements, permissions, or permits:

Required: Access permission (St. Tammany has a 60' corridor access); CWA permit (COE); Water Quality Certification (LDEQ).

Eight State and/or Federal Species are listed in the St. Tammany Parish, however, no species are listed on the 'Species of Conservation Concern' map and no suitable habitat was noted.

Mitigation Description:

Avoid impacts to western side of channel to prevent damage to riparian zone adjacent to channel. Work should be conducted from eastern side of channel whenever possible. Only new/Katrina caused debris will be removed. No live trees within the stream bed should be cut. Action will be completed without interruption.

Reseeding of riparian zone will be required after removal to minimize run-off effects in riparian zone in accordance with (342) Critical Area Treatment Standard found in EFOTG Section IV.

The proposed action is the preferred alternative. The proposed action is the least costly alternative that achieves the restoration objectives, maximizes environmental benefits and is socially acceptable.
